

**Volunteer Project Application
For improvements on District-owned property
Project less than \$15,000**

Thank you for your interest in volunteering for a project that will improve and enhance a park, field and/or facility in the Cordova Recreation and Park District (CRPD). These projects help stretch our resources and assist us in maintaining high quality standards. Planning a successful project involves making arrangements, keeping everyone informed, and cooperation and participation from many people including CRPD employees. This application will help you identify equipment, services and activities early in the preparation stages which may minimize last minute challenges that could impede progress.

The application is designed to obtain information about ANY type of small project, so if sections of the application do not apply to your project, simply indicate that the question is non-applicable (N/A). All projects will be reviewed by the District's Park Planning Department. Once the application is complete, please submit it to your district liaison who will provide the application to Park Planning. If you don't have a district liaison, you may submit the application directly to the District's Park Planning Department, 2729 Prospect Park Drive Ste. 230, Rancho Cordova, CA 95670. It will be circulated and reviewed by all affected parties within the district. You may be contacted for clarifications or additional information. Please note that the application may take up to 30 calendar days to review. You can help expedite the process by completing your application in full before submitting it for review. You may include additional sheets of paper if you need more space to adequately describe your project or if the application does not provide enough fields. You will be notified of the action taken on your application after 30 calendar days. If you have any questions, please call your district liaison or the District office at 916-842-3300.

Thank you for completing Cordova Recreation and Park District's Volunteer Project application.

We look forward to working with you!
